

Tepato Systems, Inc. Kiddie Care Management System

Child Care billing the quick and easy way

The billing aspect of running a Child Care center can consume a large amount of your time. As a business owner, you have other things that require your attention. An accurate, fast tool to create the bills for your clients would probably save you a large amount of time each month – time that could be spent on a variety of other important things.

The Kiddie Care Management System (KCMS) can handle an unlimited number of families with an unlimited number of children in each family. You simply provide your data (names, days of attendance, rates, etc.) to Tepato Systems and we perform the initial load into your database for you. This will minimize the amount of set up time needed to get you running.

Whether you bill your customers on a weekly, bi-weekly or monthly basis, KCMS can handle it. KCMS can produce your bills for any time frame that you select. Simply enter a date range and the software handles all of the calculations for you, based on rates that you apply to each child. KCMS can produce your bills accurately in a matter of minutes, including the time to print them. Once you have printed the detailed Tuition report, use a paper cutter to split it up so that each family gets only their own information (or we can force it to print one per page, if you don't mind using that much paper).

Total Tuition
For Date Range 3/1/2006 - 3/31/2006

Last Name	First Name	Regular Days	Extra Days	Regular Cost	Extra Cost	Total Cost
Michel	Patrick	9		\$423.00		\$423.00
	Margaret	9		\$382.50		\$382.50
Grand Total						\$805.50

Total Tuition
For Date Range 3/1/2006 - 3/31/2006

Last Name	First Name	Regular Days	Extra Days	Regular Cost	Extra Cost	Total Cost
Miller	Mike	4		\$188.00		\$188.00
	Susan	4		\$188.00		\$188.00
	Tommy	9		\$382.50		\$382.50
Grand Total						\$758.50

Once you've provided the bills to your customers, you begin to receive checks. If your current process does not include some verification that the checks you receive are for the correct amounts before you deposit them, KCMS can help.

KCMS can provide a summary version of the Tuition report which lists the total due per family. This summary report can be used as a checklist. Simply compare the amounts on each check to each family's total amount due as you receive each check. You can also note the date received next to the check on the list. This will help you to see at a glance which families have paid and which are still outstanding. It will also serve as proof of the timing of the receipt of the check, in case there are any questions later regarding why a late fee was charged.

Total Tuition Summary by Family
For Date Range 3/1/2006 - 3/31/2006

<i>Last Name</i>	<i>Total Cost</i>	<i>Date Received</i>
Michel	\$805.50	<input type="text"/>
Miller	\$758.50	<input type="text"/>
Tieppo	\$1,253.00	<input type="text"/>
Total Expected Tuition	\$2,817.00	

The software can also provide a variety of reports with some minimal customization effort. All customization work can be provided at an hourly rate of \$60/hour. Tell us what you need and we'll give you an estimate of what it will take to produce.

KCMS was created in Microsoft Access, version 2000. If your current computer doesn't have a copy of Microsoft Office Professional or Microsoft Access, we can get you a copy for an additional cost.

If you're not sure what you have, we can come to your location and perform an assessment of your current software and hardware. If you need a new computer, we can recommend a company that can provide the equipment you need at a reasonable price. They will set it up at your location, load all of the software you need, and provide ongoing support (if needed).
