Convert Office 2007 Documents

Can't Open a .docx, .xlsx or .pptx file?

If you have friends or business associates who are already using Microsoft Office version 2007 and you need to be able to share their files, it can be difficult. The 2007 version of files from Microsoft Word, Excel, PowerPoint and other office tools are not compatible with older versions such as Office 2003.

To convert these files for free to a format that you can open, use the link below. Their online version of the tool is free, and there's also a desktop version that is available for purchase for \$19.95.

This same site offers a variety of other conversion tools, including one to convert a variety of file types into PDF files.

Improve Your PC's Performance

Do You Get a Lot of Error Messages on Your PC?

Corruption within your registry keys, registry classes, and registry settings are the most common causes of Windows error messages. These things can happen during normal everyday use of your PC.

A local journalist did a comparison of three different registry cleaning tools. To see the comparison, use this link:
