

Tepato Systems offers software consulting services to help small business owners and non-profit groups.

If you want to make better business decisions, software and other technology tools should be key parts of your business strategy.

## Fun Gadgets for Your PC

### Personalize Your Desktop

In honor of our lovely spring, here are some fun, free tools that you can use to personalize your computer.

To download free images to use for your wallpaper or screensavers, including a nice tool to manage them, go to Webshots. The tool also includes a handy calendar that you can display on your desktop.

This site has a variety of very cool free fonts. Some of them are from movies or TV shows, such as the Flinstones and Star Wars.

This tool gives you some helpful options that can be used in Windows Explorer. It allows you to color code your folders, among other things.

[Folder Marker](http://www.foldermarker.com) - <http://www.foldermarker.com>

And finally, this one is actually useful for work-related use. If you are ever copying/pasting a series of items, this tool allows you to copy them all at once, then paste them based on a list. The normal copy/paste function can only save one item at a time.

## Spring Cleaning Should Include Your Website

### Get Rid of the Outdated Clutter

If it's been more than six months since you've updated the content on your website, please know that an outdated website is wasting your marketing budget.

While you're in the "spring cleaning" mode right now, think about what pages on your website need the most work. Make yourself a list, prioritize what should be done right away versus what can wait a bit, then contact us. We can do as much or as little as your budget will allow. A fresh website is more attractive to new customers and more useful to keep existing customers... don't let it get cobwebs!

Help with your data or with your company's website is just a phone call away... contact Tepato Systems for a free initial assessment of your needs.
